

21. A pre-mix of additives according to claim 20, wherein said antioxidant agent is selected from a group comprising ascorbic acid, salts and derivatives thereof, gallates, butylated hydroxyanisole, butylated hydroxytoluene, tocopherols.

22. A pre-mix of additives according to claim 20, wherein said preservative agent is selected from a group comprising sorbic acid and its salts, propionic acid and its salts, benzoic acid and its salts, hydroxybenzoates.

23. A pre mix of additives according to claim 20, wherein said acidifying agent is selected from a group comprising citric acid, tartaric acid, metatartaric acid, malic acid.

24. A pre-mix of additives according to claim 20, wherein said stabilising and thickening agent is selected from a group comprising starch, gelatines, alginic acid and its salts, guar gum and other gums, agar-agar, carrageenin, meal of carob seeds, pectins, cellulose and its derivatives, xantan gum.

25. A pre-mix of additives for preparing a food product, comprising an antioxidant agent and at least one of the following agents: preservative-agent; acidifying agent; stabilising and thickening agent.

26. A pre-mix of additives according to claim 25 and further comprising a sweetening agent.

27. A pre-mix of additives according to claim 25 or 26, wherein said antioxidant agent is selected from a group comprising ascorbic acid, salts and derivatives thereof, gallates, butylated hydroxyanisole, butylated hydroxytoluene, tocopherols.

28. A pre-mix of additives according to claim 25 or 26, wherein said preservative agent is selected from a group comprising sorbic acid and its salts, propionic acid and its salts, benzoic acid and its salts, hydroxybenzoates.

29. A pre-mix of additives according to claim 25 or 26, wherein said acidifying agent is selected from a group comprising citric acid, tartaric acid, metatartaric acid, malic acid.

30. A pre-mix of additives according to claim 25 or 26, wherein said stabilising and thickening agent is selected from a group comprising starch, gelatines, alginic acid and its salts, guar gum and other gums, agar-agar, carrageenin, meal of carob seeds, pectins, cellulose and its derivatives, xantan gum.

31. A pre-mix of additives for preparing a food product, comprising a preservative agent and at least one of the following agents: antioxidant agent; acidifying agent; stabilising and thickening agent.

32. A pre-mix of additives according to claim 31 and further comprising a sweetening agent.

33. A pre-mix of additives according to claim 31, wherein said antioxidant agent is selected from a group comprising ascorbic acid, salts and derivatives thereof, gallates, butylated hydroxyanisole, butylated hydroxytoluene, tocopherols.

B1 34. A pre-mix of additives according to claim 31, wherein said preservative agent is selected from a group comprising sorbic acid and its salts, propionic acid and its salts, benzoic acid and its salts, hydroxybenzoates.

35. A pre-mix of additives according to claim 31, wherein said acidifying agent is selected from a group comprising citric acid, tartaric acid, metatartaric acid, malic acid.

36. A pre-mix of additives according to claim 31, wherein said stabilising and thickening agent is selected from a group comprising starch, gelatines, alginic acid and its salts, guar gum and other gums, agar-agar, carrageenin, meal of carob seeds, pectins, cellulose and its derivatives, xantan gum.

37. A pre-mix of additives for preparing a food product, comprising an antioxidant agent and a preservative agent and at least one of the following agents: acidifying agent; stabilising and thickening agent.

38. A pre-mix of additives according to claim 37 and further comprising a sweetening agent.

39. A pre-mix of additives according to claim 37, wherein said antioxidant agent is selected from a group comprising ascorbic acid, salts and derivatives thereof, gallates, butylated hydroxyanisole, butylated hydroxytoluene, tocopherols.

40. A pre-mix of additives according to claim 37, wherein said preservative agent is selected from a group comprising sorbic acid and its salts, propionic acid and its salts, benzoic acid and its salts, hydroxybenzoates.

41. A pre-mix of additives according to claim 37, wherein said acidifying agent is selected from a group comprising citric acid, tartaric acid, metatartaric acid, malic acid.

42. A pre-mix of additives according to claim 37, wherein said stabilising and thickening agent is selected from a group comprising starch, gelatines, alginic acid and its salts, guar gum and other gums, agar-agar, carrageenin, meal of carob seeds, pectins, cellulose and its derivatives, xantan gum.

43. A pre-mix of additives according to any one of claims 37 to 42 and further comprising water.

B1 44. A confection unit containing a pre-mix of additives for preparing a food product, said pre-mix of additives comprising a powder containing a sweetening agent and at least one of the following agents: antioxidant agent; preservative agent; acidifying agent; stabilising and thickening agent.

45. A confection unit containing a pre-mix of additives for preparing a food product, said pre-mix of additives comprising water and at least one of the following agents: antioxidant agent; preservative agent; acidifying agent; stabilising and thickening agent.

46. A confection unit according to claim 44 or 45, and further comprising a sweetening agent.

47. A confection unit according to claim 46, wherein said antioxidant agent is selected from a group comprising ascorbic acid, salts and derivatives thereof, gallates, butylated hydroxyanisole, butylated hydroxytoluene, tocopherols.
